Attached are two documents related to the CZARA Forestry Riparian Issue.

The one page document is the options/action document with only one option which is to disapprove the State's CNPCP because it lacks management measures to protect medium, small and non-fish bearing streams.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

The longer document is the background/briefing document which is intended to set the stage for the proposed options/action page. Most of you have already seen a version of this.

Please feel free to provide me your thoughts/comments/suggested changes, etc.
